

# My Little Pony

## How To Diaper Your Baby Pony

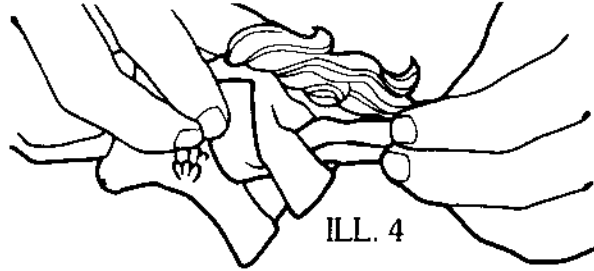

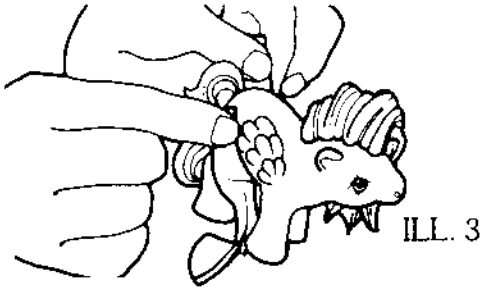

1. Spread out the diaper as shown. (ILL. 1)

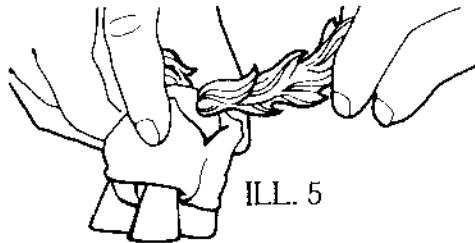

2. Place baby pony over front part of diaper with hind legs resting on diaper's curve. (ILL. 2)

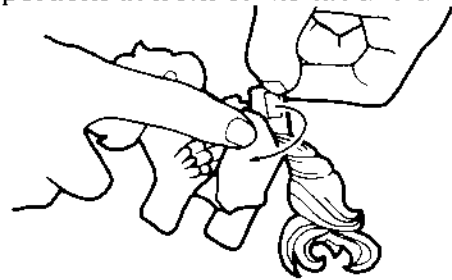

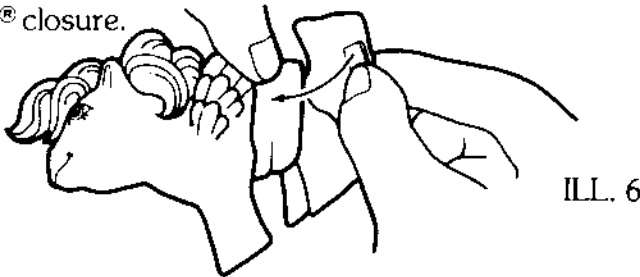

3. Lift pony and diaper together, bringing the front part of diaper up *behind* pony's front legs. (ILL. 3)  
Bring the back part of the diaper up through the *middle* of the pony's hind legs. (ILL. 4)

4. Lift the pony's tail and run it through the middle part of diaper where it forms a V. (ILL. 5)

5. Wrap sides of diaper around pony's body. (ILL. 6) Bring back of diaper up to meet each side. Attach Velcro® closures on each side. Bring together the two diaper portions in front of the tail and attach the Velcro® closure.

6. To hang rattles around Baby Firefly™ and Baby Blossom™, insert elastic into slot on handle then place over pony's head. (ILL. 7)
