

Tricks My Pretty Pony Can Do

Tickling My Pretty Pony's chin makes her happy. There's a secret lever right under her chin that you can pull down to make Pony swish her tail, wiggle her ears, and even wink her left eye. (ILL. 3)

Grooming

Combing & Brushing

Ponies' hair must be brushed and combed to keep it silky and shining . . . daily grooming is very important.

My Pretty Pony's mane and tail should be brushed with the grooming brush. Start brushing the hair at the ends, with a downward stroke until hair is untangled. Then move upwards and begin untangling another portion of the hair with the same downward stroke. Repeat until the entire tail or mane is silky smooth. Then use the comb to style the mane or tail. When combing or brushing, place your hand behind the hair to give it support. (ILL. 4)

ILL. 4

Pony wears her mane on the left side. The wisp of hair (called the forelock) should be brushed toward the front.
